PROFESSIONAL SUMMARY

Passionate Full Stack Developer with 1+ year of professional experience at Merik Solutions, building secure, scalable, and maintainable web applications. Strong hands-on expertise in **ASP.NET Core** (Web API, MVC, JWT Authentication, ASP.NET Identity) on the backend and **Angular** (components, services, routing, reactive forms, RxJS, REST API integration) on the frontend. Experienced in translating business requirements into clean, production-ready solutions using **Clean Architecture, SOLID principles, Dependency Injection, and SQL Server**. Actively seeking a Full Stack Developer role to contribute to impactful projects and grow as a software engineer.

CORE SKILLS

Backend:	ASP.NET Core, Web API, MVC, C#, .NET, JWT Authentication, ASP.NET Identity, Clean Architecture, SOLID Principles, Dependency Injection, REST APIs
Frontend:	Angular (Components, Services, Routing, Reactive Forms, HttpClient, RxJS), HTML5, CSS3, Bootstrap, JavaScript, TypeScript, AJAX
Database:	SQL Server, T-SQL, Stored Procedures, Entity Framework Core, CRUD Operations, Database Design
Authentication:	JWT, OAuth 2.0, Social Login (Google, Facebook, Apple Sign-In), Role-Based Authorization
Tools & Server:	Visual Studio, VS Code, Git, GitHub, Swagger, Postman, IIS, Angular CLI, Debugging, Performance Optimization
Legacy / Other:	Classic ASP, VBScript, ADO, Session/Application State, Legacy Code Maintenance & Migration

EXPERIENCE

ASP.NET Developer

Feb 2025 – Present

Merik Solutions — Islamabad

- Developed full-featured, database-driven web applications using ASP.NET Core, C#, MVC/Web API, SQL Server, and Entity Framework Core.
- Implemented secure authentication and authorization using JWT and ASP.NET Identity with role-based access control.
- Built scalable RESTful APIs and backend services following clean architecture, SOLID principles, and dependency injection.
- Worked with CRUD workflows, admin dashboards, comment/moderation features, and SQL-backed business logic.
- Practiced debugging, issue resolution, performance optimization, code refactoring, and Git-based team collaboration.
- Prepared to support Classic ASP environments by applying web forms, request/response lifecycle, server-side scripting, SQL, and IIS concepts.

Freelance Full Stack Developer

May 2024 – Jan 2025

Fiverr / Self-Employed

- Delivered custom full-stack web applications using ASP.NET Core, Angular, C#, SQL Server, HTML, CSS, Bootstrap, and JavaScript.
- Integrated third-party APIs, authentication systems, and payment gateways for international client projects.
- Designed responsive interfaces, connected Angular frontend with ASP.NET Core backend APIs and database operations.
- Handled database setup, REST API integration, client communication, testing, and issue resolution end-to-end.
- Maintained a 5-star client rating through quality delivery, clear updates, and reliable technical support.

PROJECTS

TaskFlow — Full Stack Task Manager Web App (In Progress)

A feature-rich, production-grade task management application built with **Angular** (frontend) and **ASP.NET Core Web API** (backend), showcasing end-to-end full-stack development skills.

- Fully functional Authentication System — Login & Signup pages built in Angular with reactive forms, validation, and clean UI.
- Social / SSO Login (SSO Functionality) — Integrated Google, Facebook, and Apple Sign-In OAuth flows for seamless one-click login.
- Modern Dashboard (in progress) — Implementing a feature-rich dashboard including: interactive Calendar with event display, Task reminders & notifications, Kanban-style task board, Progress tracking widgets, and a clean responsive layout.
- Backend secured with JWT authentication and role-based authorization via ASP.NET Identity.
- RESTful API integration between Angular frontend and ASP.NET Core backend following clean architecture.

Secure REST API

- Designed and developed RESTful APIs secured with JWT authentication.
- Integrated Swagger for API documentation and testing.
- Applied clean architecture and SOLID principles throughout.

User Management System

- Built using ASP.NET Core MVC and Web API with Angular frontend integration.
- Implemented JWT authentication, role-based authorization, and ASP.NET Identity.
- Managed users and roles using SQL Server with Entity Framework Core.

Classic ASP / Legacy Web Maintenance Practice

- Practiced Classic ASP patterns including VBScript pages, ASP form handling, Request/Response objects, Session usage, and SQL Server connectivity via ADO.
- Reviewed legacy-style code flows and mapped them to modern ASP.NET MVC/Web API equivalents for migration planning.
- Focused on maintaining existing pages, fixing SQL-backed CRUD issues, and validating inputs without breaking legacy behavior.

EDUCATION & CERTIFICATIONS

BS Computer Science

Sep 2023 – Jan 2026

Virtual University — Rawalpindi

English Language Proficiency Certificate

2023

National University of Modern Languages (NUML)

ADDITIONAL INFORMATION

Languages: English, Urdu

Portfolio: <https://stackmasterbilal.github.io/personal-portfolio>

Target Roles: Full Stack Developer · ASP.NET + Angular Developer · Junior/Mid-Level .NET Developer · Classic ASP / Legacy Support Developer
